

PEGAZUS 600 SUNTOP

Technical data:

CE category: C (inland and near shore sea)	Weight: 1050 kg
Max engine: 149,1 kW / 200 PS	Max load: 660 kg
Shaft length: L - Long shaft	Max people: 6
Dimensions L/W/H: 5,98m/2,54/2,90m	Draft minimum: 0,3 m

Escapade 600 is a cabin pilothouse type motorboat for 6 people. It's most recognizable feature is a strong rooftop on which people can comfortably sunbath. It is behaving well during driving – it's stable, take turns smoothly and with an optimal 150 hp engine can speed up to 71km/h as shown during the tests performed by BOOTE magazine specialists.

This boat is best used in our moderate climate – a mixture of sunny and rainy days during boating season. That’s because of a smartly designed bimini which in a matter of few minutes can be folded into a special compartment behind rear lounge. Side and rear windows are removable so the bimini can serve just as a sun protector. The boat is 5,98m long but it can be extended by one more meter by adding two rear platforms.

Escapade 600 is also great for water sports. The ski/wakeboard handle is installed on the roof which gives a similar advantages as a professional wakeboard tower.

The cabin is 1,98m long and 2m width which is enough for 2 or even 3 adult people. Under each mattress there's a plenty of storage. There are also hidden components for filling the middle gap to create a sleeping space in whole cabin. On the front wall there are two speakers but we also usually install TV's for our customers there. Under the cabin entrance there's a place for a small marine refridgerator. We've also found some space for a water toilet with a waste tank or a chemical portable one. Cabin is closed by lockable sliding doors made of shaded plexi glass.

Steersman's area has a plenty of space for engine gauges or additional electronical equipment including a Radio with USB input. Passenger's side has an access to a plexi glass drawer in which we install 12 V output.

Large rear lounge has a big storage beneath it, there's also a special compartment for a table. This lounge also serves as a sun-bed because of it's possibility to easily unfold and double own size. It is also a good sleeping place for 2 people when the bimini is opened.

For those who want to use their Escapade 600 for longer trips we offer various camping equipment: water installation (sink, shower and 55L tank) gascooker (installed in a special drawer in the cockpit's side), heating system and external battery charging system with an 230V output. Anchor with an electric winch.

Escapade 600 gained much customer's interest because of it's style, ergonomics and innovative solutions. It's a great boat to spend few days on water with family or friends – it provides sleeping place for 5 people and all necessary equipment which makes life easier. It is also easily towable even on a single-axle trailer which is a big advantage for many customers.

If you plan some longer journeys then you will be pleased with our “Camper package” that turns your standard Escapade into a camping boat.

In place of passenger seat you will find an extended console with large 2-stove cooker, washbasin and a 50L fridgerator with a small freezer.

NR:	PEGAZUS ESCAPADE 600 ESCAPADE SUNTOP BASIC
------------	---

PEGAZUS 600 in the standard equipment version is very well equipped and includes everything that is necessary to just choose and install an engine and the battery and start the journey with boating. In the options list you can choose from variety of additional equipment that makes our life on boat easier and more comfortable.

PEGAZUS 600 in Standardausrüstung (Dachpolstern sind nicht im Standard)

PEGAZUS 600 SUNTOP BASIC version includes:

Upper hull color choice: black RAL9005 / dark blue RAL 5011/ graphite grey RAL7024
Bottom hull, deck, rooftop and small laminate parts in color white RAL9010
Special made rooftop prepare to become a Sunbed (mattresses in option)
Gravitational deck self-draining system
A set of rails made of stainless steel (A4 316) including front rails with platform, rooftop rails with cup holders, 2 front and 2 rear cleats, 1 front U-cleat, 2 rooftop supports
LED lights set – 3 in the cabin, 3 in the cockpit under the rooftop, 1 light in the rear locker

Passenger locker and lockable cabin doors made of plexi glass
Front anchor locker with self-draining system (electric anchor in options)
Telescopic bathing ladder in a rear right locker + left rear locker
Bumper bar made of PVC + rubber inset
Mechanical steering system with a steering wheel

ADDITIONAL EQUIPMENT OPTIONS:

NR:	Cabrio cover – a foldable cockpit roof
------------	---

Cabrio (Cabriolet) is a foldable material rooftop for complete cockpit area. It is made of high quality yachting material Sunbrella that is strong and highly UV resistant. The side windows are made of transparent foil and can be detached by zippers. The rear window is designed for rolling up and attaching with straps. The cabrio is supported by a foldable stainless steel frame. A big advantage of this cabrio is that it folds completely into a locker behind a rear cockpit seat.

NR:	HYDRAULIC STEERING ULTRAFLEX ENGINES 100-300HP
------------	---

This is an upgrade (replacement) of the boat's standard mechanical steering to hydraulic power steering. It is greatly recommended for heavier and more powerful engines above 100HP. Hydraulic steering system provides a significant increase of steering precision and makes turning the steering wheel much easier.

NR:	ZUB PEG 600 Waschbasin with a tap
------------	--

A great addition for those who want to have a sweet water installation on the boat. The package consists of 42L plastic water tank (including tank vent and stainless steel water inlet on the aft), 12V water pump with a switch on the steering console, a laminate washbasin with tap installed on the left cockpit wall.

NR:	ZUB PEG 600 Rear shower
------------	--------------------------------

This package includes as previously the 42L water tank with water installation and water pump but instead of a washbasin in cockpit you have a shower.

NR:	ZUB PEG 600 Package washbasin + shower
------------	---

A package that combines both packages with Sink and Shower.

NR:	ZUB PEG 600 additional side windows
------------	--

A set of 2 openable windows installed on the sides of the cabin ceiling. They provide additional light and ventilation. They are equipped with 2 anti-mosquito nets.

NR:	Foldable rear lounge (sunbed)
------------	--------------------------------------

A bed extension that flips on hinges from below of rear cockpit lounge. It provides a great sunbed area and in combination with Cabriovertop an additional sleeping space for 2 people.

NR:	Stainless steel electric anchor package including LOFRANS electric winch, stainless steel anchor roll, stainless steel chain 25m, stainless steel plow type anchor
------------	---

In standard boat you have a front anchor locker which serves as a storage space for lines or manual anchor. This optional package changes the front anchor locker into an electric anchor system. We install an anchor roll by cutting the deck under the front platform. On an extra laminated support inside the locker we install a high quality Lofrans electric winch and a 20m of chain. The winch is operated by a switch by the steering console.

NR:	Zinc-plated electric anchor package including LOFRANS electric winch, stainless steel anchor roll, zinc-plated chain 25m, zinc-plated plow type anchor
------------	---

A more economic version of the electric anchor package. The anchor and chain are replaced from stainless steel to galvanized version. The rest of the package remains the same.

NR:	ZUB PEG 600 Table in the cockpit
------------	---

A table in deck color made of laminate. It is installed on a special stainless steel leg that has a support on the deck wall. Complete system can be detached and placed in a special attachment in the locker under the rear cockpit lounge.

NR:	ZUB PEG 600 Rear platforms
------------	-----------------------------------

A set of 2 rear platforms installed to the hull. The platforms provide very comfortable access to the boat from the water. They are very thick and durable due to 2 part laminate construction with inside enforcement so they also protect your outboard engine. With this option choice we convert the standard rear right ladder locker into an additional storing space and instead the ladder is mounted on rear right platform.

NR:	ZUB PEG 600 2 rooftop mattresses
------------	---

Escapade 600 Suntop has an unique feature of strong rooftop that can hold several people on top. All that you need to comfortably sunbath is to order this set of 2 mattresses. Special set of attachments ensure that when properly closed your mattresses will properly hold on the rooftop even during fast drive.

NR:	ZUB PEG 600 heating system
------------	-----------------------------------

Certified boating heating system made by German Eberspächer. The package is extended with a custom made 20L aluminum diesel tank (including stainless steel diesel inlet installed on the aft) with a diesel level sensor. The heating system has 2 outlets – one in the cabin and second closeable outlet in the cockpit area. The heating control panel and diesel level gauge are located in the cabin. The heating system is equipped with temperature sensor to automatically keep the designated temperature inside your boat.

NR:	ZUB PEG 600 shore power with battery recharging system
------------	---

A system for connecting your boat to the 230V in the harbor. The external part of the system consists of 15m certified 230V cable with marine plugs and a 230V hermetic nest installed on the boat aft. Then inside we guide the 230V into a circuit breaker box to provide maximum safety. The package also includes 12V15A Victron Energy automatic battery charger and additional 230V nest inside the cabin.

NR:	ZUB PEG 600 AUDIO SYSTEM + 4 Speakers (SONY MARINE USB+BLUETOOTH)
------------	--

Take your favourite music on your boat with this audio system package. The package includes Sony Marine USB/BT radio installed on the steering console and a set of 4 speakers. External 2 speakers are waterproof Sony in color white and 2 inside the cabin normal Sony speakers are in black.

NR:	ZUB PEG 600 fridgerator 30 WAECO DOMETIC CD 30
------------	---

A stationary electric 12V fridge installed in the cabin below the cabin entrance. Big advantage of this fridge is low electricity consumption and silent work. It has approx. 30L of cooling capacity (no freezer).

NR:	ZUB PEG600 ski/wakeboard handle on the rooftop
------------	---

A handle for ski or wakeboard made of stainless steel installed on the rooftop. A big advantage of this handle is that it is installed high which helps the ski rider to get out of the water. Do not attach any other water toy to this handle (f. ex. Water donut / banana).
