PEGAZUS 425 FISHER is an excellent fishing boat for those who seek a reliable and robust construction. Key features of this product are:

- **Performance and Design** – hull has a sharp front for cutting waves but then flattens towards rear to ensure high stability. The rear part of the hull, on both sides of the transom, is extended and work as trim flaps to ensure faster planning speed and reduced bow lift during planing speed.
- **Durable and practical construction** – the construction is full GRP (glass fiber polyester) with only side and front shelves made out of water resistant plywood which is secured with fiberglass. Complete deck is covered with grey Top Coat layer which can be easily repainted after years of usage to restore your boat to brand new look
- **Comfort of usage** – spacious and wide deck makes you feel comfortable and safe during boat usage. It also fits all the necessary equipment. High board made it possible to put seats higher so it's more comfortable to use them.
- **Big middle storage** – with locks for a padlock, to provide you with all the necessary space to store your equipment and belongings
- **Easy to transport** – it was designed to be transported on a light trailer up to 550-750 kg total weight with load so you can take your boat everywhere you want.

PEGAZUS 425 FISHER is designed for fishermen that look for fairly simple and practical boat. It is equipped with fishing rod handles on both sides of the deck. The side shelves are great place for additional fishing rod handles, echosounder handles and many other equipment.

The deck construction is wide and spacious. It is also very stable on water that most fisherman will appreciate. It also has plenty of space to install fishing chairs.

Big advantage of new PEGAZUS 425 FISHER is the big middle locker. It is lockable with a padlock and can store a lot of equipment.

Another technical features are drain valve installed near the transom. The cockpit is not self draining but you can use it to drain the water during planing speed or on a trailer. There is also a channel for cables from the transom area to the bow area to enable electric anchor winches or bow trolling engines.

PEGAZUS 425 Fisher performs best with a 20-25HP engine and offers a dynamic and fast driving capabilities. It can also be equipped with a pair of oars.

The new PEGAZUS 425 Fisher offers a lot for such an affordable price. It is a great choice for fishermen and all who look for using a boat professionally.
